

CID Roadmaster Overbanding System - HAPAS No. 20/295

5m x 35mm

Product Code: **LM00018**

Pack Quantity: **12**

CID's Roadmaster Thermoplastic Overbanding System (HAPAS) is a quick and efficient tape that seals joints in asphalt surfaces to prevent water and frost damage which can lead to holes and cracks.

Complete with a high friction surface, CID's Roadmaster overbanding tape is easy to use, remaining malleable when cold, making cutting and application a simple process

KEY FEATURES

- 5m x 35mm
- HAPAS approved - Certificate No. 20/H295
- High friction surface (skid resistance)
- Cut to any desired length
- Easy torch-on application
- Highly durable
- Stops joint fretting instantly
- Malleable when cold

KEY FEATURES

CID's Roadmaster overbanding system is HAPAS approved. All products that are used on our roads need to be certified by a UKAS accredited Certification Body.

HAPAS (The Highway Authorities' Product Approval) is a nationally recognised approval scheme for innovative products and systems that are used in highways and related areas.

For a product to be HAPAS approved, it undergoes thorough laboratory and road testing, performance trials, site inspections and product evaluation.
